Commercial/Industrial Consulting Solutions

Technologically Advanced Methods for Water Conditioning & Treatment...
Chemical-Free

THE GREEN MARKET ANSWER

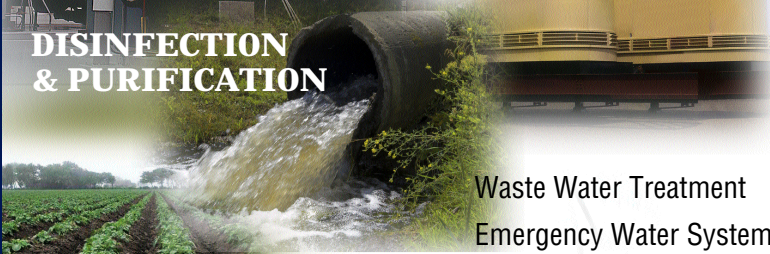

HARD WATER CONDITIONING & TREATMENT

- Public Swimming Pools
- Spray Systems
- Food Processing Equipment
- Trucking
- Maritime Cargo
- Veterinary

FILTRATION

DISINFECTION & PURIFICATION

- Waste Water Treatment
- Emergency Water Systems
- Laundry & Cleaning Industry

WATER SUPPLY

- Pollution Remediation
- Water Treatment
- Waste Water Treatment
- Emergency Water Systems

INDUSTRIAL PROCESS

- Petro Chemical
- Aluminum
- Chemical Plastics
- Fabric Manufacturing
- Food Processing
- Pulp & Paper Industry
- Pharmaceuticals
- Breweries

TWT APPLICATIONS: RESIDENTIAL & LIGHT COMMERCIAL

- Swimming Pools & Spas
- Medical/Dental Offices
- Boilers
- Medical/Dental Offices
- Aquariums
- Car Wash
- Pollution Remediation
- Water Treatment
- Iron Removal

COMMERCIAL

- Cooling Towers
- Filtration Equipment
- Heat Exchangers
- Condensers & Chillers
- Evaporators
- Boilers/Water Heaters
- Power Generation
- Condensers
- Irrigation

AGRICULTURAL APPLICATIONS

- Dairy Products
- Irrigation Systems
- Poultry
- Farming
- Any Where The Need For Clean
Water To Use And Drink
Is Required!

Triangularwave Technologies Inc. offers a comprehensive range of consulting services & tech support.

Consisting of water analysis, system evaluation, regulatory treatment requirements, technological solutions, and application & installation guidelines.

These services are ideally suited for all applications including Well Water, Municipal Water, Process and Waste Water Treatment and Conditioning; and anywhere the need for cleaner water to use and drink are required.

Water Analysis: Why Test Your Water?

Although the testing approach may seem bothersome, it is like a good routine physical by a health-care specialist. Avoiding this step is to assume that “what you don’t know won’t hurt you.” Sorry, but it will! Avoiding the truth may result in health problems and costly repairs to your plumbing system and other fluid fed equipment (protect your investment). This can easily be accomplished by a local independent water testing lab.

A copy of the report should be sent to TWT, Inc. with the **Rapid Request Response Form**. TWT’s engineering staff will review the report; TWT will contact you if necessary to discuss the appropriate treatment, products, systems and installation for your specific needs.

Treatment System Evaluation: What can I do ?

- Hard water scaling
- Corrosion
- Water staining
- Water odors
- Bacteria
- Algae
- Fouling expensive appliances
- And Any Where The Need For Clean Water To Use And Drink!

Regulatory Treatment Requirements:

All TWT Water and Fluid management Solutions conform to CSA, NSA, AWWA, CE and UL efficacy standards. Continuous monitoring of the Regulatory Treatment Requirements is an ongoing process to ensure that the industry wide standards are met.

Pre & Post Filtration:

Based on water analysis and specific requirements

Product & System Selection:

Based on above evaluation

Application & Installation Guidelines:

Based on selected technologies

Who We Are:

TWT engineering & consulting, incorporated in 1993, in the state of New Jersey, headquartered in Closter, NJ. with manufacturing/warehousing in the U.S.A and Canada.

TWT is the exclusive marketer and distributor of chemical free fluid management solutions centered on the patented Triangularwave Technologies, (TWT) Deposit Control Systems. The company offers technologically advanced fluid management solutions for residential, commercial and industrial applications; systems integration and/or retrofit program needs worldwide.

As an additional service of TWT, our engineering staff consists of diverse group of bright, passionate and driven individuals with years of engineering and design experience who combine their talents as a team, revolutionizing the way fluid management products and systems are designed, implemented and distributed.

Our mission is to isolate your fluid problems, inform you of the applicable technology and provide the implementation cost effectively. The Consulting Pool delivers your specific fluid management solution. This provides you with complete control of your water treatment policy for now and the future.

The First Step in achieving clean water is a filtration system that effectively removes particulate matter and similar debris.

The Second Step in achieving clean water is the TWT Chemical-Free Deposit Control Technology (hard water problems solved easily)

The Third Step in achieving clean water is the TWT Ultra Violet, Ionization and/or Ozone Disinfection & Purification Technology. The output water is thus disinfected and offers exceptionally high quality for human consumption and use.

The Fourth Step in achieving clean water is a post filtration system if necessary and/or required.

Regardless of the application or budget, TWT has the right water treatment solution that will enable you to get the quality water you deserve.

Request Process, Fee Schedule & Rebate

By Request Form:

This is the best way. Just download **Rapid Request Response Form** fill in all appropriate information and fax: 201-750-1096 or email: info@triangularwave.com. Attn: Consulting Dept.

Proposal Delivery:

Upon receipt of response form(s), confirmation will be sent to the customer(s). We will respond to all requests no later than one week from time of receipt.

Working with TWT, Inc. makes sense from an environmental, operational, economical and safety point of view!

REQUEST PROCESS AND FEE SCHEDULE

CONSULTING/TECH SUPPORT FEE (Initial consulting FREE)

If additional consulting is required, fees will be discussed on a case by case basis.

Our initial written consultation includes the evaluation of the water analysis you provided. It also consists of a treatment process evaluation, filtration, treatment and conditioning, disinfection and purification to obtain safe water for the intended use.

A specific product and/or system application and installation guidelines quote will be supplied if requested at no additional charge as part of the initial consultation.

Above information will be sent with appropriate support documentation.

IN DEPTH /COMPREHENSIVE REPORT

Upon written request, this report would cover items such as schematic renderings, specification reports, complete system/facility evaluation, additional fluid/water testing (if necessary), research based on specific regulatory requirements, and third party verifications. Please make written information as broad based and inclusive as possible.

FEEES FOR COMPREHENSIVE REPORT

Will be submitted for client approval prior to the implementation of the request and will be based on in-house work @ \$50.00 per hour. Our on site rate (with advanced notice) is \$800 per day plus expenses.

Don't Wait...Contact us today for a free consultation!!! (Info@triangularwave.com) And/or for information on what TWT treatment products or systems will meet your industry specific needs.
