- Industrial

**Triangularwave
Technologies Inc.**
offers a comprehensive
range of consulting
services & tech support.
Consisting of water analysis, system
evaluation, regulatory treatment
requirements, technological solutions,
and application & installation guidelines

Water Analysis: Why Test Your Water?

Although the testing approach may seem bothersome, it is like a good routine physical by a health-care specialist. Avoiding this step is to assume that "what you don't know won't hurt you." Sorry, but it will! Avoiding the truth may result in health problems and costly repairs to your plumbing system and other fluid fed equipment (protect your investment). This can easily be accomplished by a local independent water testing lab.

A copy of the report should be sent to TWT, Inc. with the **Rapid Request Response Form**. TWT's engineering staff will review the report; TWT will contact you if necessary to discuss the appropriate treatment, products, systems and installation for your specific needs.

Treatment System Evaluation: What Can I do?

- Hard water scaling
- Water odors
- Water staining
- Fouling expensive appliances
- Corrosion
- Mold / Fungus
- Bacteria
- Algae

Regulatory Treatment Requirements:

All TWT Water and Fluid management Solutions conform to CSA, NSA, AWWA, CE and UL efficacy standards. Continuous monitoring of the Regulatory Treatment Requirements is an on going process to ensure that the industry wide standards are met.

Bringing You The Best in Fluid Management Solutions: TWT® The Ultimate in Water Treatment & Conditioning, **THE GREEN WAY.**

TWT engineering & consulting, headquar-
tered in Closter, NJ. with manufacturing/
warehousing in the U.S.A and Canada.
TWT is the exclusive marketer and
distributor of chemical free fluid manage-
ment solutions centered on the patented
Triangularwave Technologies, Deposit
Control Systems. The company offers
technologically advanced fluid manage-

ment solutions for residential, commercial and industrial
applications; systems integration and/or retrofit program
needs worldwide.

As an additional service of TWT, The Consulting Pool
consists of diverse group of bright, passionate and
driven individuals with years of engineering and design
experience who combine their talents as a team, revolu-
tionizing the way fluid management products and
systems are designed, implemented and distributed.

Our mission is to isolate your fluid problems, inform you
of the applicable technology needed and provide the
implementation cost effectively. The Consulting Pool
delivers your required fluid management solution. This
