WHAT IS IN OUR WATER?

• Every day, 50 billion gallons of liquid hazardous waste are disposed at 26,000 disposal sites, 85% are located above aquifer. Some chemicals, such as TCE are too toxic, a single gallon can contaminate a years worth of drinking water for 3800 people.

• Over 500 billion pounds of hazardous chemical waste are improperly disposed of every year.

• More than 80 percent of diseases are caused by contaminated water supplies¹.

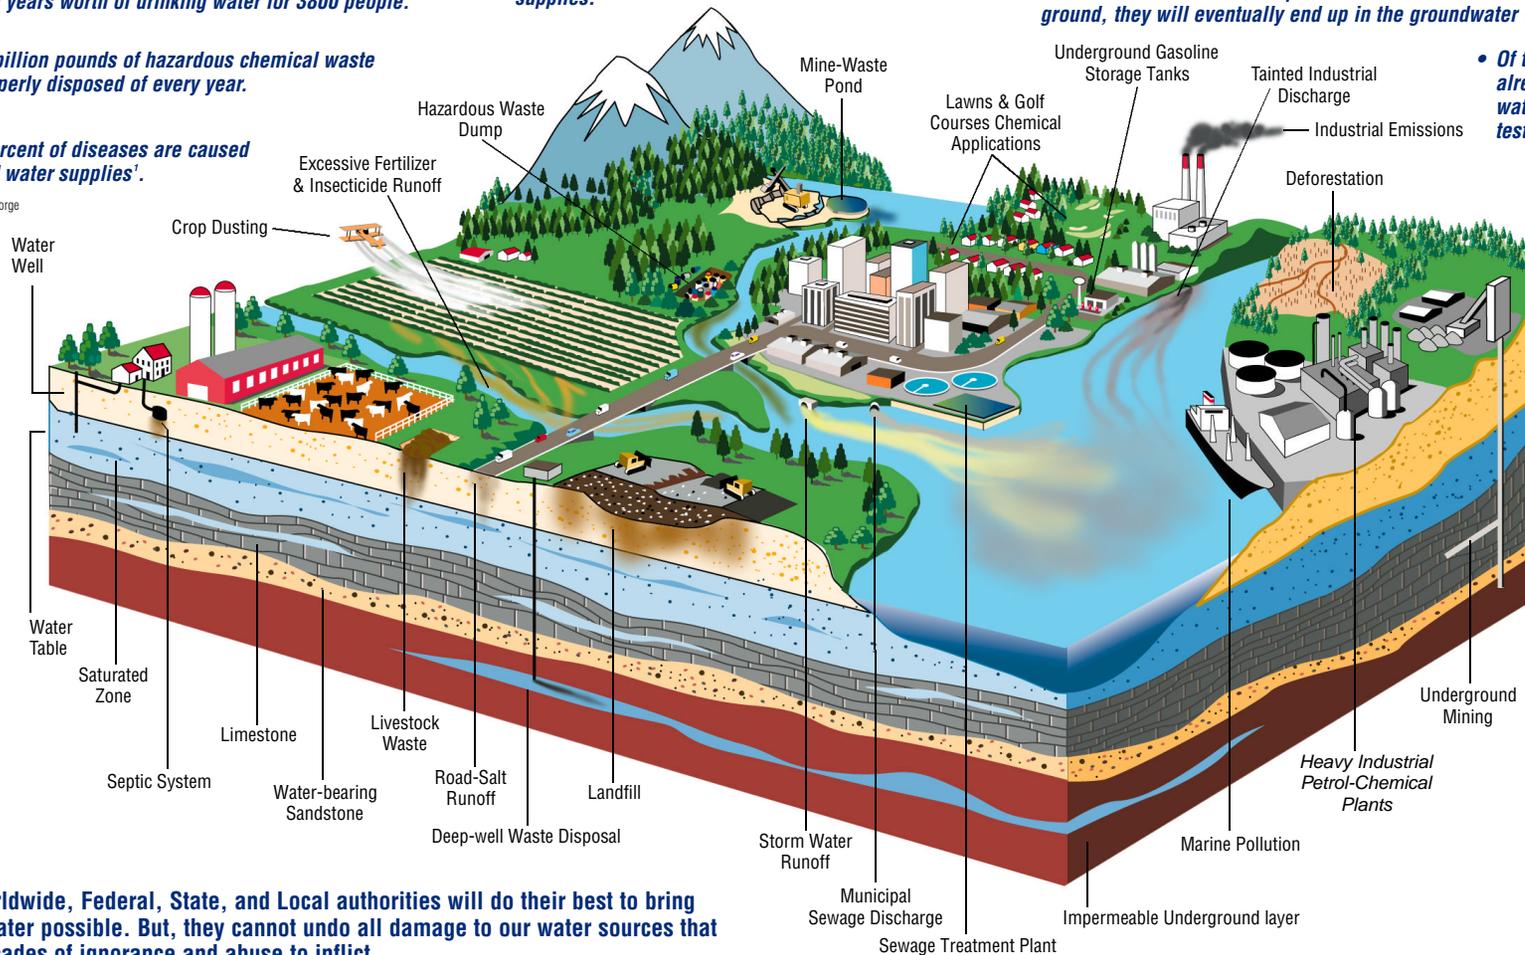

¹The Big Necessity- by Rose George

• Every year, 100 billion gallons of liquid hazardous waste are absorbed into groundwater supplies.

• Of the 1,000 EPA Priority waste sites in the U.S., less than 20 have been cleaned up since the EPA's inception.

• This much we know... If we put toxic chemicals into or on the ground, they will eventually end up in the groundwater we drink.

• Of the 700 chemicals that have already been found in drinking water, most water companies test for less than 30.

Countries worldwide, Federal, State, and Local authorities will do their best to bring us the best water possible. But, they cannot undo all damage to our water sources that has taken decades of ignorance and abuse to inflict

At our manufacturing facility, we have pioneered the advanced design of fluid management products & systems to meet the needs of residential, commercial, and industrial applications worldwide. TWT, Inc. manufacturing expertise is reflected in it's efficient engineering design team. Our technical test department is meeting the ever changing requirements of the fluid management environment. Our

unique capabilities and design expertise have successfully solved a wide variety of problems for a wide variety of customers. Triangular Wave Technologies, Inc. offers several systems designed to treat and fit your specific needs. These systems improve water quality, save energy, are none chemical, safe and cost effective.

Conserve Water, Save Energy...Non-Chemical, Safe, Cost-Effective Treatment System:

TWT® The Ultimate in Alternative Energy, Water Treatment & Conditioning: The Green Way

CHEMICAL-FREE
