Hard Water Problems Solved Easily!

TWT offers a full range of products & systems designed to address fluid problems wherever fluid flows. From TWT® patented deposit control technology to pre and post filtration needs, disinfection, and ultraviolet purification treatment and conditioning. Components and subsystems chosen from across the range of treatment methods can be combined in different configurations to provide custom solutions specific to your facility site or application.

- **Eliminates Deposits in Pipes, Fixtures and Equipment**
(Softens and removes hard scale build-up around plumbing fixtures)
- **Controls Algae and Bacteria**
(Prevents the formation of biofilm, the breeding ground for algae and bacteria)
- **Removes Existing Scale on Heat Exchangers Over Time, Which Improves Heat Transfer for Greater Efficiency**
- **Reduces Soap Scum and Improves Lather of Soap**
- **Reduces Detergent and Soap Use**
- **Reduces Effects of Hard Water on Skin and Clothes**
- **Salt and CHEMICAL-FREE Water Conditioning**
- **Pennies Per Day to Operate**
- **Cost Effective**
- **Easy to follow application & installation manual**

Filtration • Patented Deposit Control Technology • UV Disinfection & Purification

TWT All-In-One Kits are available for larger pipe applications, GPM requirements and process technologies may be up-graded, changed to meet your specific water treatment requirements upon request.

All Kits include double filtration with and extras set of replacement filters, filter wrench, chemical-free deposit control (hard water treatment) and ultra-violet purification technology.

Note: All products are shipped with easy to follow application, installation and maintenance materials. Handy man and/or licensed plumbing contractor application and installation suggested. Note: If water feed lines at the facility are PVC / Pex or Non-magnetic material, you will not need the Copper pipe signal enhancer. Copper pipe signal enhancer optional, must specify if not required when placing purchase order.

(All pumps, pipes, fittings and other related plumbing equipment needed, owners responsibility).

TWT® Multi-Process All-In-One Chemical-Free Water Treatment: Staged Filtration, Hard Water Conditioning, Treatment and UV Purification Technology "The Competitive Edge"

#TWT-AIOKIT: 4 GPM

For pipes up to 3/4" in diameter

Kits Include:

- One (1) 10" Double Filter Set – Sediment & Carbon
- One (1) Triangularwave Chemical-Free Deposit Controller with a Copper pipe signal Enhancer for copper pipe application only. # TWT-5C8-472CSE
- One (1) 4-GPM Ultraviolet Purifier. # TWT-UV-250

TWT-AIOKIT: 8 GPM

For pipes up to 1" in diameter

Kits Include:

- One (1) 20" Slim-line Double Filter Set – Sediment & Carbon
- One (1) Triangularwave Chemical-Free Deposit Controller with a Copper pipe signal Enhancer for copper pipe application only. # TWT-5C8-472CSE
- One (1) 8-GPM Ultraviolet Purifier. # TWT-UV-700

TWT-AIOKIT: 12 GPM – For pipes up to 1" in diameter

Kits Include:

- One (1) 20" Big Blue Double Filter Set – Sediment & Carbon
- One (1) Triangularwave Chemical-Free Deposit Controller with a Copper pipe signal Enhancer for copper pipe application only. # TWT-5C8-472CSE
- One (1) 12-GPM Ultraviolet Purifier. # TWT-UV-1200

Note: Kits are available in 110/20-V or 220/30-V
Must specify with Purchase Order.
