

Customer Applications: Triangularwave Patented Chemical-Free Deposit Control Technology

Chemical-Free Fluid management Solutions for the Irrigation & Agricultural Industries

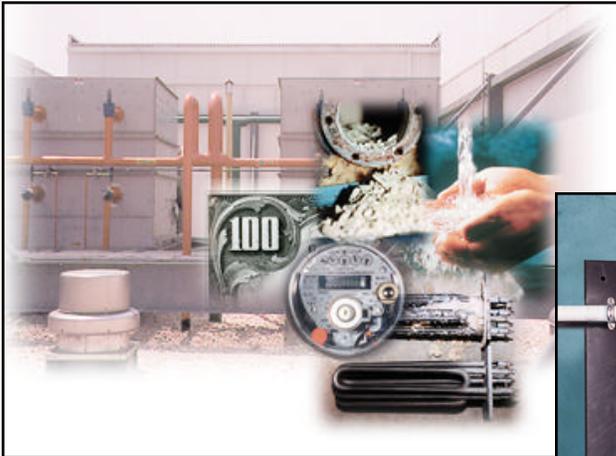

TWT® Deposit Control unit for water conditioning and treatment at agriculture facilities.

Deposit controller and on-site solenoid coil application

Commercial Installations: HVAC Treatment Options

TWT® Saves: Chemicals, Water, Energy, Labor, Time & Materials

Chemical-Free Fluid Conditioning & Treatment for the HVAC Industry

Side-Stream

Filtration, deposit control, side-stream for (HVAC) cooling tower application. The TWT Bypass Fluid Treatment System is a fully integrated, factory-assembled and mounted treatment system combining patented TWT Deposit Control and IonGuard purification technologies. Designed to provide a practical answer to

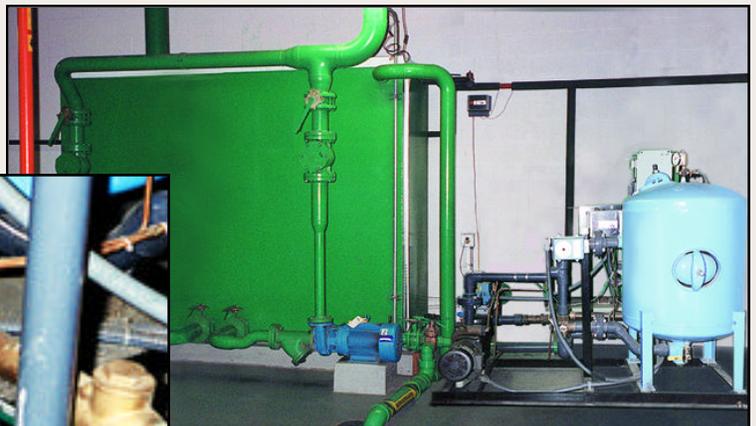

large pipe diameter and recirculating fluid treatment problems. The Bypass System offers a much sought after solution at an economical price.

Enhancing Water Quality, Improving HVAC Operating Efficiency and Equipment Life Cycle

TWT Total water Control Systems All In one packaged unit

Skid-mounted Multi-Process factory integrated All-In-One, filtration, deposit control, installed for HVAC treatment & conditioning.

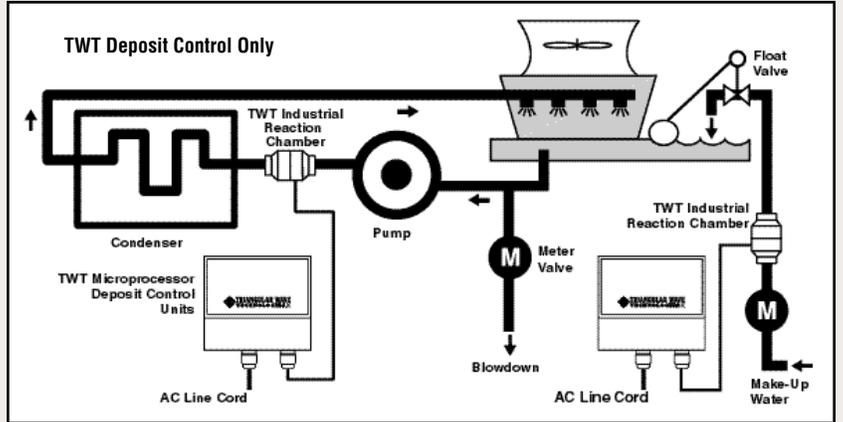

Custom units build to suit, to meet required flow rate (GPM) and treatment requirements.

Commercial Installations: HVAC Treatment Options

Deposit control units, point-of-use HVAC recommended application.

Customer Applications: Wall Mounted Multi-Process Filtration, Deposit Control & Purification Technology

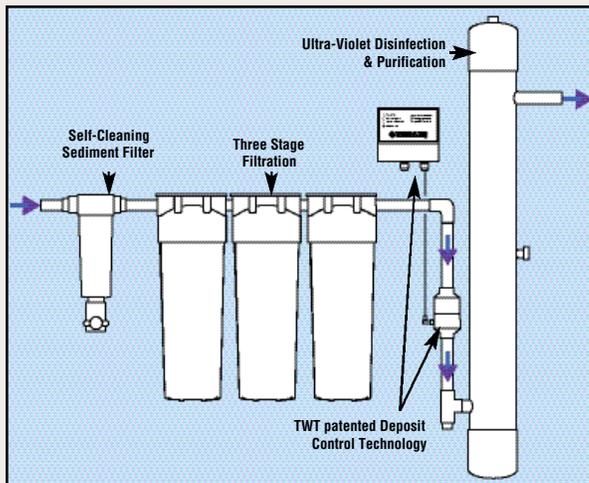

TWT® Offers A Bold Series of Chemical-Free Products & Systems Designed To Meet The Demanding Challenge In Fluid Management. Technologically Advanced Methods for Water & Fluid Treatment, Providing Comprehensive End-To-End Solutions. Meeting The Needs Of Any Industry & Application.

Multi-Process stand alone filtration, deposit control, ultra-violet disinfection & purification installed at a residential facility (end-to-end treatment & conditioning). Custom designed & integrated systems to meet customer specific treatment requirements.

Triangular Wave Technologies, Inc. All-In-One fluid management systems, the ultimate in water treatment & conditioning

TWT® systems are factory engineered and assembled, applying all of the needed elements for maximum fluid protection, management, and peace of mind in one simple packaged solution. TWT® Filtration, Microprocessor Deposit Controller, Reaction Chamber, and UV Disinfection units are combined to provide a start-to-finish answer to simplified prevention, treatment and management of water line contamination dangers.

Multi-Process factory integrated All-In-One modular unit, filtration, deposit control, ultra-violet disinfection & purification installed at a dental facility (end-to-end treatment & conditioning).

Customer Applications: Wall & Skid Mounted Multi-Process Filtration, Deposit Control & Purification Technology

Bacteria & Biofilm Control for the Home, Office, Medical, Dental and Laboratory Environments.

Multi-Process factory integrated All-In-One modular unit, filtration, deposit control, ultra-violet disinfection & purification installed at a high-end residential facility (end-to-end treatment & conditioning).

The TWT® All-In-One water filtration, disinfection and purification systems are unique, compact, self-contained units (easy installation & operation).

Skid-mounted Multi-Process factory integrated All-In-One modular unit, filtration, deposit control, ultra-violet disinfection & purification installed at an overseas facility for irrigation use. (Football & Soccer Fields)

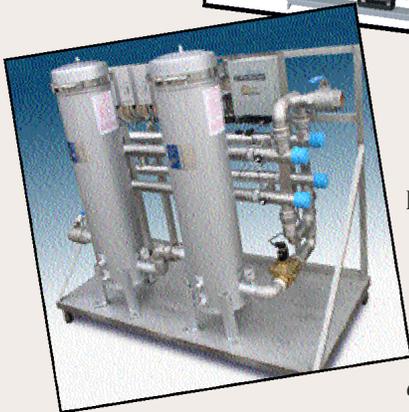

Skid-mounted Multi-Process factory integrated All-In-One modular unit, filtration, deposit control, ultra-violet disinfection & purification installed at a multi-dwelling residential facility.

University test proves Triangularwave Technologies, Inc. (TWT®) Deposit Control System reduces the fouling effects caused by "hard water" on the quartz sleeve and UV lamp inside the disinfection/ purification unit while maintaining the residual effects downstream chemically free.

System Solutions For Site-Specific, Application and Required Treatment Technology

Factory integrated and mounted multi-process All-In-One modular units, filtration, deposit control, ultra-violet disinfection & purification and other systems as illustrated, built and shipped to customers worldwide.

Technologically Advanced Methods, Products & Systems For The Treatment & Conditioning of Water & Fluids

- Filtration
- Patented Deposit Control Technology
- Ultra-Violet Disinfection and Purification to Effectively Meet The Needs Of Any Application, Commercial, Industrial and Residential.

Chemical-Free water treatment, conditioning, purification products and systems.

Value Added Technology, System Integration, Retrofit Programs, Industry Specific Custom Design, Consulting & Training Available Upon Request.

No matter How Tough the Job... TWT® Is The Solution.

For additional support material and featured installations, visit www.triangularwave.com and click on industrial applications on top of home page. There you will see additional features and benefits of working with our companies, products, systems and consulting service.

We sincerely thank you for your time and interest in our products, and look forward to being a valued part of your operation

GO GREEN-SAVE GREEN
